

Meeting with Group (1/18/2022)

General Meeting Abilities

- We need to find a time to meet ourselves and do things
- Taban might not have time to meet with us every week, but it'll probably be on Thursdays 10am
- Who wants to do what
 - Jayme - Interface, Machine Learning
 - Natalia - All aspects, floater
 - Stephen -Database, Machine Learning
 - Connor - Machine Learning
 - Cesar - Database with MySQL, and maybe Machine Learning
- Floor Plan for everyone
- What point in the project do we implement?
 - Make the whole thing and then implement
- No team leader, because we're good, if it happens it'll be naturally
- Top of the list to make a prototype
- Talk about on Thursday, what should the task be for everyone's first project
- Database has the user data and feeding that information to Machine Learning
- Prototyping- Figma (Look into this as well)

Action Items

- ⇒ Email Taban about UI and make sure he'll be there on Thursday
- ⇒ Attempt to find a more permanent time to meet as just a group
- ⇒ Have a shell of UI designed
- ⇒ Everyone be working on Python and the floorplan for the project
