

## Meeting Minutes | Dr. Vajda 2/15/22

### What's Left

- Modified SRS
  - User Manual
  - Explanation of the functions
  - Final Presentation
- Peer Review

### What we did/going to do

- Natalia
  - Did: Working on the home page, set up the html, nav bar, create tasks, containers are ready
  - Going to do: Go into JavaScript and then creating the functionality of the main page
- Stephen
  - Did: Adding user
  - Going to do: Work with Jayme on the API to React JS
- Connor
  - Did: Focused on making a model database on the AI portion so he can work on the AI and focus that
  - Going to do: Figuring out another attribute to include in the AI, test these results and then go from there (Manhattan?)
- Jayme
  - Did: Created the main log in page, Presentation, 470 and such
  - Going to do: need to meet with Natalia and Stephen to go over the remainder of the UI pages and hooking up the database from JS to Python
- Cesar
  - Did: Some work on the API, and functions to add tasks and projects to store into the database
  - Going to do: Layer in-between the front and and the database, need functions to get information and entries
